

Activity Report APRIL 2022-MARCH 2025

Introduction

The Academy Trust (tAcT) was set up in August 2014 as a registered public charitable body under the aegis of the Indian Academy of Sciences, Bengaluru.

It aims to bring about a tangible change in the way science is taught and implemented in the educational system and society in general. The Trust focuses on areas like capacity building, promoting outreach activities, particularly in areas where there is an urgent need for intervention, fostering innovation and excellence in Science and Technology, collaborating with other organizations for implementing joint programmes, improving research and education in science and engineering, and setting up science education chair/professorships.

The Trust fulfils these objectives through the following ways:

1. Science Education Outreach
2. Academia- Industry Partnership
3. Endowment Chair Professorship

Trustees

The Trustees are drawn from members of Council and senior Fellows of the Academy. The current Trustees are as follows.

Chair and Managing Trustee:

Raghavan Varadarajan (President)

Ex-Officio Trustees:

Umesh V Waghmare (Previous President)

V A Raghunathan (Treasurer)

Balasubramanian Gopal (Secretary)

Gaiti Hasan (Secretary)

Trustees:

K N Ganesh (*Director, Indian Institute of Science Education and Research, Pune*)

S Sivaram (*Indian Institute of Science Education and Research, Pune*)

V S Chauhan (*Visiting Scientist, International Centre for Genetic Engineering & Biotechnology, New Delhi*)

Anil Kumar (*Scientist, National Chemical Laboratory, Pune*)

Sujatha Ramadorai (*Professor, Department of Mathematics, University of British Columbia, Canada*)

S Shivaji (*Director, Prof. Brien Holdon Eye Research, LV Prasad Eye Institute, Hyderabad*)

Anil K Singh (*Professor, Indian Institute of Technology, Mumbai*)

Science Education Outreach

tAcT organises educational events in schools, colleges and other institutions across the country. Many of the programs are done in collaboration with organisations that have similar objectives to tAcT.

Apart from regular annual events like National Science Day, National Mathematics Day and Teachers Day, tAcT conducts signature programs like:

- ***Vijnana Harate*** – informal interactions between students and scientists/educators
- ***Vijnana Aranya*** – outreach in rural, tribal and remote areas
- ***Vijnana Yuvati*** – skill-oriented outreach to benefit young women
- ***Vijnana Nataka*** – outreach through the medium of theatre and music
- ***Ganitha Mela*** – exploring Mathematics through a variety of activities including games and cultural & entertainment programs

Outreach Committee

The Committee is composed of Trustees/Fellows/Associates set up by the President of the Academy for a term of 2 years, extendable for a second term. The current members are:

Tirthankar Bhattacharya (Chair)

N Sathyamurthy

Academia - Industry Partnership

Advisory Board members from Industry:

Kiran Mazumdar-Shaw - *Biocon*

Anubhav Saxena – *Pidilite Industries Ltd.*

Vijay Chandru – *Strand Life Sciences*

Ajit Sapre - *Reliance Industries Ltd.*

Prakash Singh - *Tata Steel*

Industry Internship Programme

Summer Fellowships are awarded to bright students and motivated teachers to work with Fellows of the Academy on research-oriented projects. Starting in 1995, this program has grown enormously in size and reputation. Approximately 2000 such fellowships are now offered to students and teachers each year with travel and living expenses paid. Announcements inviting applications appear on the websites of all the 3

major Science Academies of India, viz., IASc, INSA and NASI, as well as in popular science journals and other media around October. The candidates are shortlisted by the 3-Academies' Science Education Panel Selection Committee comprising senior scientists, industry experts and educators from all around the country. The selected applicants are notified by February-March, and undergo the internship during May-July.

Our current industry partners are **Tata Consultancy Services (TCS)** and **IISc-Axis Bank Centre for Mathematics & Computing**.

Tata Consultancy Services (TCS): The TCS team select a few candidates from a longlist sent by tAcT, who then undergo the program at TCS Pune.

IISc-Axis Bank Centre for Mathematics & Computing: Starting from 2023, the IISc-Axis Bank Centre for Maths & Computing is partnering with The Academy Trust to sponsor around 20 candidates who would undergo the SRF program at the Indian Institute of Science at labs of all disciplines.

Endowment Chair

The Springer-Nature Chair is tied to the Academy's journal publishing agreement with Springer-Nature. The program features an eminent scientist who visits India as the Springer-Nature Chair and delivers lectures and holds interactions with scientists in scientific institutions across India related to their area of expertise.

APRIL 2022-MARCH 2023

VIJNANA HARATE

8th July 2022: The full-day program was a collaboration between the Academy Trust, Indian Academy of Sciences and Raman Research Institute. About 80 students from Bapu Composite Pre-University College, Yeshwanthpur, and Govt. High School, Malleswaram, participated along with their science teachers.

The morning sessions included a presentation on 'Atmospheric composition and climate change' by Academy Associate Binita Pathak, 'Perspectives in Math and Art' by Academy Fellow Supurna Sinha, and experiments on Electricity & Magnetism by Gopalakrishna and Biswal from Visveswaraiah Industrial Museum.

The post-lunch session was conducted by Madhusudan from the Jawaharlal Nehru Planetarium, followed by a visit to the Archives Gallery and the Raman Museum.

24th September 2022: The first ever Kannada 'Vijnana Harate' was conducted in collaboration with Munnota Trust, an organisation that promotes science in the regional language. Around 50 people including students of a Kannada-medium school and members of general public, attended the event that was conducted in the local tongue Kannada, by Prof. MRN Murthy, a Fellow of the Academy.

The topics ranged from Optics, Geometry and Botany, to Evolution and Genetics. A discussion on science education in schools and colleges, and the necessity of a healthy scientific awareness among the public was also held with an audience consisting of the general public.

4-6th November 2022: 3 days of programs were conducted by tAcT during the Academy's 88th Annual Meeting at SRM University, AP.

The first day's program was conducted by Madhusudan of Jawaharlal Nehru Planetarium, Bengaluru, whose experiments in optics, thermodynamics and sound for students of Sri Charan Vidyaniketan and SRM University.

On the second day, Academy Fellow Prof. Debabrata Dash of BHU Varanasi held a session for students of Shamrock High School on research in medicine.

The third day's session was a harate on Astronomy & Astrophysics by Academy Fellow Prof. Ram Sagar of IIA Bengaluru, for students of Lakireddy Balireddy Engineering College.

22nd December 2022: A Kannada 'Vijnana Harate' was conducted by Kollegal Sharma, former chief scientist of CFTRI, in collaboration with Munnota Trust. Children from Kannada medium schools and general public participated in the program held in the RRI campus.

6-8 January 2023: tAcT participated in **Science in Action**, Bengaluru's biggest science fest, held at the BVJ Science Centre between 6-8 January 2023, featuring exhibitions, demonstrations and activities by organisations like ISRO, FSSAI, JN Planetarium, Agastya Foundation, etc. In a joint effort with the Academy, tAcT held an exhibition and 2 harate programs.

The first was conducted on Saturday by Shashi Thutupalli of NCBS, who engaged high school students, teachers and the general public in a freewheeling session that explored the most fundamental questions of nature, and emerged at the other end with the realisation that most "answers" are simply the beginning of other questions!

On Sunday, Uday Maitra of IISc, with the assistance of his wife Samita, held an audience hooked with demos on various chemical phenomena. With a colourful mixture of fun and fact, he showed how "Chemistry is everywhere!"

VIJNANA NATAKA

Among the unique ways tAcT propagates science and scientific temper in society is through its Vijnana Nataka (Science Theatre) initiative. During 2022, two plays were held in the prestigious HN Kalakshetra auditorium of National College Jayanagar, in collaboration with Arivu Trust, Mysuru.

9th December 2022: The first was on Nobel laureate Richard Feynman.

23rd December 2022: The second was on Nobel laureate Abdus Salam.

Portraying both the characters was actor Yatheesh Kollegal, who also directed the plays. Both plays were translated into Kannada by Shashidhar Dongre ("QED" from the original English by Peter Parnell, and "The Trial of Abdus Salam" by Nilanjan Choudhury).

21st January 2023: The Kannada play 'Lilavathi' was held in the HN Kalakshetra auditorium of National College Jayanagar, in collaboration with Arivu Trust, Mysuru. It is based on the life of Bhaskara II who lived during 12th Century AD, introduces parts of Bhaskaracharya's treatise and explores contributions of Indian mathematics with a historical perspective. Written by Shashidhara Dongre, and directed by Nataka Academy award winner HS Umesh, a well-known theatre personality in Karnataka.

NATIONAL SCIENCE DAY 2023

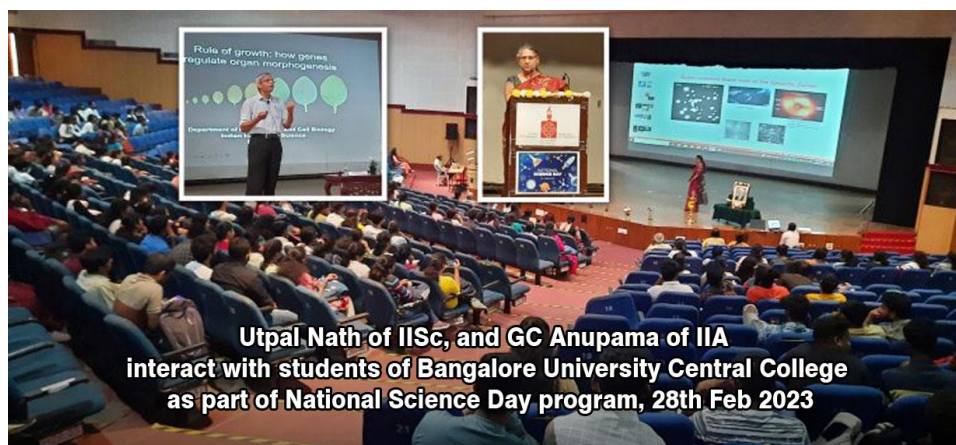

Like the previous year, tAcT celebrated National Science Day as a series of events spanning several days in different venues.

21st February 2023 - APS College of Arts & Science

The day featured a colourful variety of science-themed activities including Quiz, Painting, Debate, Essay and Rangoli competitions. Materials scientist Prof. Arun Umarji of IISc (Retd.), using the example of Ceramics in everyday life, showed how much the progress of a country--including its economic development--depends on the results of scientific research.

28th February 2023 - Bangalore City University

**Utpal Nath of IISc, and GC Anupama of IIA
interact with students of Bangalore University Central College
as part of National Science Day program, 28th Feb 2023**

Organised in collaboration with the Academy, National Science Day was celebrated at Bangalore University Central College campus, where Sir CV Raman made the official announcement of his historic discovery. Prof. Lingaraja Gandhi, Vice-Chancellor of the University, enlightened the audience of this fact, and a surprising number of other connections that the Nobel Laureate had with the University. A film showcasing the life of the great scientist was shown, along with presentations by Prof. Utpal Nath of IISc who spoke on how genes regulate growth in plants, and Prof. GC Anupama of IIA who took the audience on an awe-inspiring journey of the Cosmos.

TEACHER TRAINING PROGRAMS

9th September 2022: About 35 science teachers from various schools in and around Bengaluru participated in the full-day science and pedagogy workshop which was facilitated by our collaborators ScienceUtsav and Seed2Sapling Education. Sessions were conducted by the S2S team and Shashank of ScienceUtsav.

Prof. Abdul Rehman Pasha, distinguished scholar and educator, made a presentation on Young Minds and Scientific Temper: The Role of Teachers.

The post-lunch session featured discussions on pedagogy, followed by a visit to the Raman Museum.

3rd March 2023 - Indian Academy of Sciences

Organised in collaboration with the Academy and Science Utsav, this full-day event was designed as a practical guide that science teachers could use on a regular basis. Science communicator Manasa Chidambar engaged the participants in craftwork and other activities that they could implement in their classrooms.

The next session was conducted by veteran Teacher Trainer and Principal of National College Jayanagar, Dr. YC Kamala. She shared ideas and case studies where students not only conducted methodical research to fulfil project goals, but also learned presentation skills to effectively communicate their work.

Shashank Karnam showed how simple materials can be used to demonstrate scientific phenomena and concepts found in school textbooks.

Apart from these, there was a session on hands-on tinkering in Electronics & Coding. At the end of the event, mementos, and books published by the Academy were presented to the resource persons and participants.

NATIONAL MATHEMATICS DAY 2022

22nd December 2022: tAcT collaborated with the Ramanujan Mathematics Club and the Department of Mathematics of Acharya Patshala College to celebrate National Mathematics Day 2022. More than 100 participants from different colleges attended the event which sought to enhance students' mathematical reasoning and problem-solving abilities, with the long-term view of inspiring students to pursue careers in mathematical sciences and research. Two sessions were held during the program.

V. Sivashankara Sastry, veteran math communicator, made a presentation on "Magic Squares in Indian Culture" by discussing their historical and philosophical significance, their early presence in temples, their application in tantric traditions, and the advanced mathematical methods for their construction outlined by ancient Indian mathematicians like Nārāyaṇa in his work *Gaṇitakaumudī*.

B.S. Krishnamurthy, Founder of Ganitha Kunitha, Mysuru, held a session on "Dance of Maths - The Art of Learning Mathematics".

APRIL 2023-MARCH 2024

VIJNANA HARATE

29th April 2023: Conducted by Academy Fellow Prof. KN Ganeshaiah on 29th April 2023 at National College Basavanagudi, where he illustrated the importance of curiosity and rigorous scientific study with demos and several real-life examples, including one about a student of Jane Goodall whose observation of chimpanzees led to a whole new field of research called Zoopharmacognosy; and one about his own PhD student, whose study of the nesting behaviour of birds showed how much intelligence lies behind innate natural instincts. The interactive session that followed was filled with questions and ideas covering almost all fields of science.

14th July 2023: Conducted by Dr. Seetha Somasundaram, Program Director of ISRO's Space Science Program Office during the Mars Orbiter Mission, for high school students of Anantha Vidyanikethan, Devanahalli. Although the harate started with Astronomy, it eventually led to a Q&A session covering subjects ranging as far afield as theoretical mathematics and applied engineering.

This was followed by a visit to the RRI Archives Gallery and the Raman museum.

21st August 2023: Students from 2 institutions, SBS PU College and Vishwa Vidyapeeth, participated in a full-day program that featured presentations by two eminent speakers. Prof. Jayarama Kadandale, Director of Centre for Human Genetics, explained techniques like Karyotyping to identify chromosomal abnormalities, and how efforts are being made to educate people about the genetic basis of birth defects, so that these conditions could be prevented from being passed on to future generations.

Dr. Yelamaggad from the Centre for Nano and Soft Matter Sciences (CeNS) created a buzz with his talk, "How one can become invisible!" and showed ways in which it could be achieved through research into exotic materials.

The harates were followed by a visit to the Raman Museum and RRI Archives Gallery.

30th August 2023: Organised in collaboration with KSCST, for high school students of Aditi Public school the day featured demonstration of the Scientific Method by veteran science communicator Madhusudhan of JN Planetarium, followed by a presentation and experiment-observe-infer activity conducted by a team of creative professionals from Navakshitija.

These were followed by a visit to the Raman Museum and RRI Archives Gallery.

9th September 2023: Dr. S. Seetha, former Director, Space Science Program, ISRO, conducted two harates at two venues in Mysuru. The first was at Vanitha Sadana, a school for girls from underprivileged communities, where she answered questions from curious kids and elders about astronomy in general, and the Aditya (Solar) Mission in particular. The second harate was arranged by Kollegala Sharma of Kutuhali at a Social Welfare Department hostel for young women, where she shared instances and advice from both her professional and personal life with the students.

16th November 2023: Prof. Vikram Jayaram, who conducted the harate for high school students of Siddaganga Public School, started with Lord Rayleigh's century-old experiment and explained how that led to the invention of detergents used for washing clothes. From there, he went on to connect the dots showing how advances in materials research and engineering made it affordable and safe for people to travel by flight; how durable and smart materials find uses in everything from heavy industry to clinical surgery; and so on. From questions about familiar household objects (How can a kitchen knife that cuts anything, break?) to geopolitics (How China has a stranglehold over the world because of its rare earth resources), the harate addressed diverse topics.

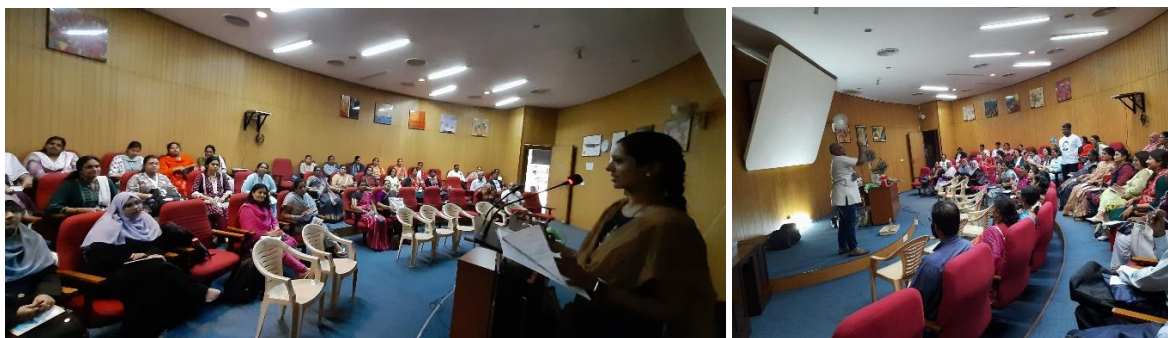

TEACHER TRAINING PROGRAMS

13th September 2023 (Teachers Day) - Indian Academy of Sciences

Teachers' Day was celebrated in collaboration with Karnataka State Council for Science & Technology (KSCST) and Science Utsav. The event focussed on exploring new and innovative ways to teach science, with a particular emphasis on the National Education Policy syllabus.

After an “explosive” launch to inaugurate the day, Anjani Hegde of KSCST described the activities undertaken by her organisation.

This was followed by a demo of practical Physics experiments by Achutha, and sessions on experiential learning and pedagogy by Manasa Chidambar, Neha Niharika and Shashank Karnam of Science Utsav.

2nd November 2023 - BITS Pilani Goa

As part of the Joint Science Academies' Education Panel (SEP) Mini-Symposium for invited teachers held during the Academy's 89th Annual Meeting at BITS Pilani - K K Birla Goa Campus, tAcT invited veteran Teacher Trainer and Principal of National College Basavanagudi, Dr. YC Kamala to conduct a session on pedagogy. Her presentation included practical tips on engaging high school and college students via activities involving not just observation and experiments, but how get them to write research papers and make presentations professionally.

VIJNANA ARANYA

13-27th April 2023: The first Vijnana Aranya (remote and rural science outreach) program was organised in collaboration with the Centre for Applied Sciences, Government Degree College (Men), Andhra Pradesh. With the assistance of M. Pradeep and other faculty members, Prof. HS Misra of GITAM University, Visakhapatnam, conducted four full-day workshops on various topics related to Life Sciences and Ecology for students of Government College (Men)-Srikakulam (13th April 2023), Government College (Women)-Srikakulam (15th April 2023), Gurajada PU College (20th April 2023) and Sri Aditya College (27th April 2023).

15th July 2023: Students of Systems Educational Institute, a Pre-University College in Ponduru, AP, took part in a day-long series of activities which included aerodynamic modelling, volumetric analysis, and experiments in Physics and Biology conducted by Prof. Yogendra Sarma, Deputy Director and Dean of Biological Sciences, IISER-Berhampur.

VIJNANA YUVATI

Vijnana Yuvati was conceived to empower young women by training them on specific scientific/technical knowledge to enable career/livelihood.

26th August 2023: Holy Cross College, Nagercoil

The comprehensive one-day entrepreneurship workshop for women: Science for Sustainable Livelihood was conducted at Holy Cross College Nagercoil, and was sponsored by Emcure Pharmaceuticals as part of its CSR initiative.

The workshop was conceived to empower young women between the age-groups of 18 to 25, for encouraging skill development, entrepreneurial spirit, and subsequently achieving sustainable economic independence. About a hundred young women from neighbouring villages were engaged in technical sessions by resource persons for creating entrepreneurial spirit and giving them knowledge on available governmental and non-governmental funding resources and subsidised schemes for women entrepreneurs for starting a business.

V. Samuel Gnana Prakash, EMBO Fellow, DAAD Fellow & Marie Curie Fellow, illustrated the indispensable role of science in magnifying entrepreneurial opportunities, particularly emphasizing its significance in the regional context.

Arul Jerald Prakash, a renowned scientist & former Director of Kerala State Science and Technology Museum & Priyadarshini Planetarium, Trivandrum, delved deep into the realm of eco-entrepreneurship. He championed the idea of women utilizing local resources, tapping into government schemes, and thriving as entrepreneurs, especially in an era of limited job opportunities.

Focused Hands-on Training and Workshop Sessions were conducted in four distinctive areas:

Fish Product Preservation & Marketing: This session provided hands-on training in Fish products manufacturing, Meat and Vegetable pickle making and gave insights into the potential of the culinary sector, emphasizing nuances, product packaging, and the importance of FSSI certification.

Jute Product Creation & Sales: Led by Ms. Packialakshmi from M/s Sarakontrai Jute Products, participants created mini jute items like jute purses, carry bags and files instilling practical skills for potential business ventures using the sewing machines and jute material given to each of them.

Vermicomposting & Vermiculture: Attendees were introduced to sustainable farming practices, specifically the art of vermicomposting at the Cross Verm Composting Centre. They were provided with organic grow-bags, cow-dung, earth-worms, dry leaves and

accessory equipment using which they made miniature composting bins. Each bin was expected to make 3 to 4 kg of vermicompost. This practical hands-on would help them to scale up in a larger level of business.

Aquarium Production & Fish-keeping: The Multipurpose Hall turned into an aquatic entrepreneurial hub, with in-depth hands on training on making aquarium tanks followed by fish breeding sessions and discussions on fish breeding techniques, aquarium design, aerator pumps, decorative materials for aquarium followed by business mentoring for the same. The participants were provided with glass pieces, silicone gel, shot glue guns and other material required for the training.

At the end of the event, certificates were distributed to all participants.

NATIONAL MATHEMATICS DAY 2023

Ganitha Mela 2023, 18 – 22 December 2023 (Monday to Friday), held at Vishwa Vidyapeeth, Yelahanka

Organized jointly by tAcT, Vishwa Vidyapeeth School, Seed2Sapling Education; and supported by Karnataka State Council for Science and Technology, the week-long event witnessed the convergence of over 8000 math enthusiasts, students, and teachers from more than 60 schools from not only Karnataka but other states.

The event was inaugurated by Padma Shri Kiran Kumar, the renowned space scientist associated with ISRO. His words set the tone for the days to come, emphasizing the role of observations, asking questions and significance of mathematics in our lives.

The participants engaged in Harates led by several mathematicians and scientists like Kiran Kumar of ISRO, Sujatha Ramdorai of University of British Columbia, Rohini Godbole, Tirthankar Bhattacharyya, Phoolan Prasad, MRN Murthy and Utpal Nath of IISc, Amitabh Joshi of JNCASR, Rajaram Nityananda, Samuel Joseph and Supurna Sinha of ICTS, and Nithin Nagaraj of NIAS.

Other popular science and maths communicators like Kollegala Sharma, VSS Sastry and BS Krishnamurthy also conducted harates and activity sessions.

Ganitha Mela offered a plethora of math-related activities, puzzles and games that catered to participants of all ages.

The interactive activity stalls became hubs of excitement, where students and enthusiasts delved into the world of numbers, patterns, and logic.

The visitors experienced several activities around math concepts like pi, Pythagoras theorem, Fibonacci sequence, etc. in the form of games and puzzles.

Classical games like *Aaliguli Mane*, Snakes and Ladders, Tower of Hanoi and many others added to the entertainment component.

The evenings at Ganitha Mela 2023 were a celebration of the cultural aspect of mathematics.

From classical and folk music to dance performances, and the acclaimed kannada play "Lilavathi" on the life of Bhaskara II, the cultural programs showcased the intersection of mathematics and the arts.

These included shadow puppetry by Padma Shri Parshuram Gangavane, a classical dance Jugalbandhi of Bharatanatyam and Kathak, a musical jugalbandi of Carnatic classical instruments, a show on geometry in soap foams and bubbles by Samuel Joseph and Supurna Sinha, and other math-based performances like math-magic and mind-reading.

Maths-related activity kits were distributed to all the visiting students, and all speakers and guests were honoured with custom-made Ganitha Mela mementos.

The Ganitha Mela was widely reported as a first-of-its-kind event in several newspapers, TV channels and social media platforms.

22 December 2023 - Acharya Patshala College

tAcT also collaborated with the Ramanujan Mathematics Club and the Department of Mathematics of Acharya Patshala College to celebrate National Mathematics Day 2023. More than 160 participants from different colleges attended the event.

D. Radha Krishna, Retired Professor and Vice –Principal of Vijaya college, Bangalore inaugurated the morning session and gave a brief insight into the life history and achievements of the Srinivasa Ramanujan.

N.S. Kumar, Educationist & Researcher engaged the students on the topic “Fun with Maths Counting & Computing”, where he explained about Ramanujan numbers, Magic Squares, Determinant concepts etc., in a very simple manner.

T.K. Prasanna Murthy, Karnataka State Resource person for Secondary school Mathematics, talked about the works of Ramanujan and infinite series of numbers, continued fraction, Pell’s equation, and Brahmagupta’s formula. He demonstrated various models related to Mathematics to help understand the concepts in a very easy manner.

Certificates were distributed to the winners of Maths Talent Search Examination conducted for PU students on 13th Dec 2023, during the program.

INDUSTRY INTERNSHIP PROGRAMME

TCS: Tata Consultancy Services: The MoU between tAcT and TCS was renewed during 2023-24, extending it up to 2026. During 2023 no candidates were able to take up the internship for various reasons.

IISc-Axis Bank Centre for Mathematics & Computing: During 2023, nineteen B.Tech candidates from different institutes across India were selected for this prestigious initiative and worked on various projects in different IISc labs. The list of students is given below.

Srivatsan Sarvesan
National Institute of Technology,
Tiruchirappalli

Manas Choudhary
Indian Institute of Technology, New
Delhi

Reeya Varghese B
Sathyabama Institute of Science &
Technology, Chennai

Sneha Mary Biju
National Institute of Technology,
Kozhikode

Monisha Surana
Jaypee University of Information
Technology, Wakhnaghat

Vedant Vijaykrishnan
Manipal Institute of Technology,
Manipal

Himkant Sharma
Indian Institute of Technology,
Kharagpur

Swastika Sinha
PES University, Bengaluru

Arvind Srinivasan
Indian Institute of Technology, Yerpedu

Varshith Reddy Ravula
Chaitanya Bharathi Institute of
Technology, Gandipet

Shubhranil Chatterjee
Indian Institute of Technology, Mumbai

Gaurangee Parashar
National Institute of Technology,
Surathkal

Sarthak Anand
Indian Institute of Technology - Banaras
Hindu University, Varanasi

Bezawada Kusuma
Lakireddy Bali Reddy College of
Engineering, Mylavaram

Sadhvika Chaparla
National Institute of Technology, Raipur

Rajashri Varadaraj
National Institute of Technology,
Surathkal

Harshal Patel
Sardar Vallabhbhai National Institute of
Technology, Surat

Ankita Das
University of Calcutta, Kolkata

Mohd Faiz
Aligarh Muslim University, Aligarh

APRIL 2023-MARCH 2024

VIJNANA NATAKA

Among the unique ways tAcT propagates science and scientific temper in society is through its Vijnana Nataka (Science Theatre) initiative. In 2024, we were co-organisers of the 7th annual Mysuru Science Theatre Festival, the only one of its kind in India. The 4-day event, conducted in Mysuru from 20-23 July 2024 in partnership with Kutuhali, Parivarthana Ranga Samaja, Arivu Trust and Kalasuruchi Mysuru, played to house-full audiences composed of students and the general public.

Day 1: **Vignana Vikasada Vaada**, a Kannada play on scientific temperament down the ages, from Galileo to Darwin to the present. Directed by Yatheesh Kollegala and performed by Viveka Ranga, a troupe of girl students hailing from more than half-a-dozen districts across the state.

Day 2: **AC vs DC**, a Kannada play by faculty members of an Engineering College in Dharwad, on the conflict between Edison and Tesla, and its societal ramifications during their times. The play held up a mirror to professionalism and ethics (or their lack thereof) among scientists by taking the example of one of the longest-running scientific disputes.

Day 3: **Galileo's Daughter**, an English play by Parivarthana troupe composed of ex-ISRO scientists, theatre veterans and first-timers, was a gripping performance of the timeless story of a scientist's struggle against unyielding authority and irrational society.

Day 4: **Hasire Honnu**, a Kannada biographical play by Arivu group, on eminent Kannada litterateur BGL Swamy and his substantial contributions to science, specifically in the field of Botany.

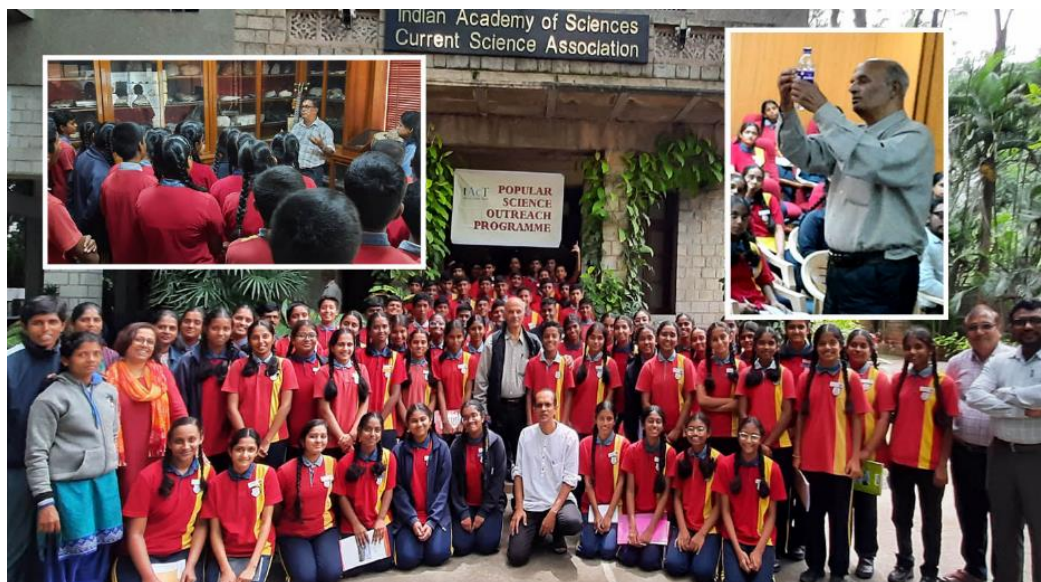

Apart from the plays, each day featured a prelude event: Dialogue excerpts from science plays in English and Kannada, science-themed songs in Kannada, and an Art-&-Mathematics exhibition curated by BS Krishnamurthy.

The event was widely covered by the press, and received glowing reviews in both traditional as well as social media.

VIJNANA HARATE

23rd July 2024: With the recent discoveries made by the James Webb telescope and ISRO's string of successful missions, interest in astronomy is at a peak. **Prof Ram Sagar**, who conducted the harate with several interesting anecdotes and demos on the subject, was inundated with questions and ideas by students of **Anantha Vidyaniketan**. The students were also taken on a curated visit of the Raman Museum and RRI Archives Gallery.

1st Aug 2024: From the serendipitous discovery of detergents, to smart memory-materials that help prevent heart attacks, **Prof Vikram Jayaram** revealed the impact of materials engineering research on everyday things we take for granted, to students of **Deens Academy**. The students later visited the Raman Museum and RRI Archives Gallery.

A New Partnership: Beginning in August 2024, tAcT began collaborating with *Jawaharlal Nehru Centre for Advanced Scientific Research* to help extend its outreach programs.

26th Aug 2024: In the first joint program with JNCASR, students of **Vanita Sadan**, a school for economically deprived children in Mysuru, spent a curiosity-fuelled day in the JNCASR campus and labs guided by Vinayak Pattar. Apart from participating in science demos and experiments, the students listened to talks, and interacted with, Ranjani Viswanatha and Shwetha Shivaprasad. An immediate and encouraging after-effect of the day's program was, when asked for their feedback, many of the girl students responded that they would like to pursue a career in scientific research.

28th Aug 2024: In the second joint program, students of **MES Kishore Kendra**, Bengaluru, were treated to a series of highly engaging experiments and activities by Vinayak Pattar and his team. They also visited the HIV Lab and the CNR and Chemistry Galleries.

23rd Sep 2024: Students from two institutions, **Sri Bandeshwara Swamy Pre-university College** and **Vishwa Vidyapeeth**, participated in a Vijnana Harate conducted by reputed maths educator VSS Sastry, who engaged them in his unique style featuring stories of mathematical discoveries and concepts, using art and origami. The students also visited the Raman Museum and RRI Archives Gallery.

8th Nov 2024: Students from five regional schools attended a full-day program organised jointly by tAcT and the outreach team of **NISER Bhubaneswar**, held during the Academy's 90th Annual Meeting. Vijnana harate sessions were conducted by Prof Sankara Rao of IISc who revealed astonishing facts about the history and diversity of trees in India, and by Prof Ranganath Naval Gund of ISRO who engaged the youngsters in an impromptu discussion on how satellite technology is invaluable not only in predicting meteorological phenomena but in helping to maintain fishing communities along the Indian coastline. The students also attended demo sessions at various labs of the institute, led by Dr. Debasmita Pankaj Alone and the NISER outreach team.

3rd January 2025: The Academy and tAcT, in association with Karnataka Jnana Vijnana Samiti Bengaluru Chapter, organised a Vijnana Harate for high school students of **BEL Public School**. Conducted by veteran maths and science educator VSS Sastry, the students learned mathematical concepts by doing origami, and about the scale and scope of the Solar System using props spread across the RRI campus. The students also visited the Raman Museum and RRI Archives Gallery.

3rd January 2025: tAcT participated in the 'Supernova 2025' event organised at National College Basavanagudi, where Madhusudhan of Jawaharlal Nehru Planetarium conducted a Vijnana Harate on experimental Physics.

7th February 2025: The Academy and tAcT, in association with COSOL, organised a Vijnana Harate for high school students of Kallankuppe High School, Kanakapura. Frog expert KV Gururaja, Manipal Academy of Higher Education, enlightened the students on the wonderful and strange world of amphibians.

VIJNANA ARANYA

As part of its regional-language remote outreach, tAcT organised 3 Vijnana Aranya programs during April 2024 to March 2025.

13th Sep 2024: The first program was conducted at **MC Thalalu Govt School**, Saragur, where primary students participated in science demos and a puppet show on ecology by award-winning science educator Subbulakshmi. The afternoon session, conducted by professional apiculturist Guruprasad, was attended by high school students as well as interested villagers who wanted to learn about beekeeping as a supplementary means of income. An exhibition of science projects by the students of the school was also on display for the occasion.

2nd February 2025: The next Vijnana Aranya program was conducted at **Om Shantidhama Veda Gurukula**, Kanakapura, inside the Mekedatu forest reserve. The morning session featured astronomical observation of sunspots with sophisticated telescopic equipment with guidance from M. Krishnamurthy, science & Astronomy educator, who then explained solar phenomena to the students and teachers of the school.

The afternoon session was conducted by T.S. Channesh, Director of Srusti R&D Foundation and the Centre for Public Understanding of Science. He gave a talk on discovering the beauty and importance of soil biodiversity with the help of demo materials, then held a discussion with the students in which many unknown facts about soil came to light.

1st March 2025: Extending the National Science Day program into a remote outreach, tAcT organised the third Vijnana Aranya at **Dr. APJ Abdul Kalam Residential School**, Doddakaanya village near Nanjangud. More than a hundred students from 6th to 9th Grade participated in the full-day program. The morning session was conducted by popular science educator 'Pelican' Manu who delivered a talk on ecology and the environment, followed by a demonstration on organic farming. The students then formed small groups to create 'botanical art' with leaves, twigs and stones found within the grounds of the campus.

In the afternoon, popular arachnologist Dr. Abhijit APC of Mysuru astonished the audience with secrets about the world of common household spiders, and how different species play a vital role in maintaining the ecological balance.

NATIONAL MATHEMATICS DAY 2024

tAcT collaborated with the Ramanujan Mathematics Club and the Department of Mathematics of Acharya Patshala College to celebrate National Mathematics Day on 24 December 2024. More than 100 participants from different colleges attended the event which sought to enhance students' mathematical reasoning and problem-solving abilities, with the long-term view of inspiring students to pursue careers in mathematical sciences and research.

Krishna Chaitanya, well-known math communicator, conducted a session on "Unlocking the Wonders of the Essence of Math," following it up with a Mathematics quiz.

Prof. Ramesh BK of Jain College conducted the afternoon session with a discussion on "Numbers Beyond Counting: The Magic of Number Theory," covering prime numbers and their cryptographic applications.

INTERNATIONAL DAY OF WOMEN AND GIRLS IN SCIENCE

11th February 2025

tAcT, in collaboration with the Academy, its Women-in-Science Panel, the Inter-Academy's Women-in-Science initiative (IAP-WiSTEMM), and in association with Karnataka Jnana Vijnana Samiti Bengaluru Chapter, organised a full-day science workshop for girl students in honour of Prof. Rohini Godbole and Dr. Manju Sharma. The participants included students from 3 high schools and a batch from Maharani's Science College for Women, Bengaluru.

The morning session was held in the RRI auditorium, where Shobhana Narasimhan, Chair of the Academy's Women in Science Panel, and her group from JNCASR started off the day with a skit on common gender biases prevalent in society. Each Act was discussed and debated with the audience after it played out and ways to overcome these situations were explored.

This was followed by the release of Kannada and Odia language editions of Academy publication "Lilavati's Daughters" by Pushpa Murthy, Shobhana Narasimhan, Ram Ramaswamy and Kamala YC.

Pushpa Murthy of Michigan Tech spoke to the audience about her journey and all the hurdles a woman scientist faces while navigating the world of academia and a career in science.

YC Kamala, with her experience as former Principal of both, National College Jayanagar and Basavanagudi, two of the most prestigious institutions of Bengaluru, showed facts and figures relating to the participation of girls in science education and in scientific research in India.

The afternoon session featured an audience interaction with Srikanth Sastry of JNCASR, who offered a male scientist's perspective on the issue of gender disparity.

Shreeya Pal of Breakthrough Science Society concluded the day's proceedings with anecdotes of great Indian women like Anandibai Joshi and Savitribai Phule who made major, yet largely unacknowledged contributions to science and societal development of the country.

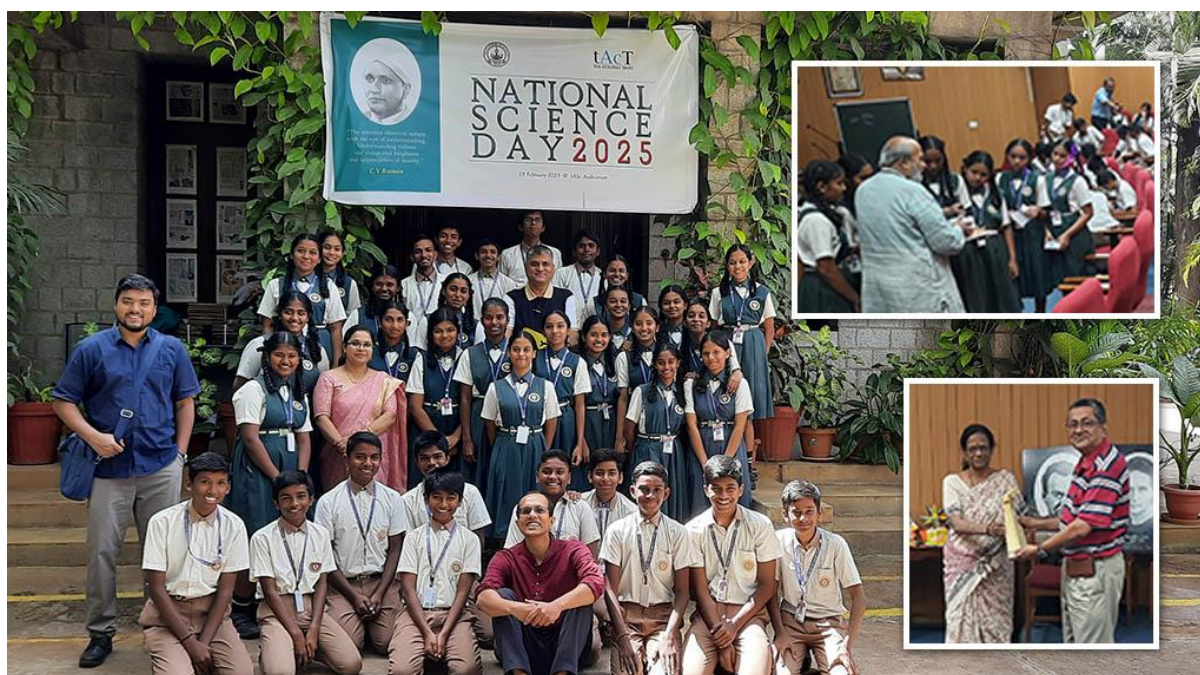

NATIONAL SCIENCE DAY 2025

National Science Day is held on 28th February every year to commemorate the discovery of the Raman Effect. This year's event was celebrated by the Academy and tAcT, in association with Karnataka Jnana Vijnana Samiti Bengaluru Chapter. The full-day event featured 3 Vijnana Harate sessions for high school students of **Bapu High School**. The first was conducted by VSS Sastry and Praveen, who engaged the students in activities like origami to explain mathematical concepts.

The second harate was conducted by Vikram Jayaram on how the “common” materials that are used by society on an everyday basis are the result of decades of research and development in Materials Engineering research.

In the afternoon, Kartik Sarkar, astrophysicist from RRI, discussed astronomical phenomena in a highly interactive session with the students.

OTHER RELATED ACTIVITIES

29th November 2024: The Academy and tAcT hosted the **2024 Young Kalam Science Fest** organised by HCL Foundation in the Academy auditorium and RRI Library and campus. School students and teachers from several Government primary schools from across Karnataka participated in the event which featured a science model exhibition that was judged by scientists from RRI and senior teachers and educators. The prize distribution ceremony was followed by a discussion on how science can be made more accessible and interesting to schoolchildren through simple and innovative methods.

COLLABORATIVE OUTREACH PROGRAMS

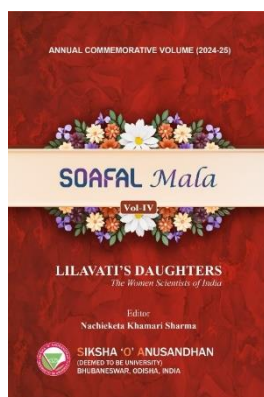

Lilavati's Daughters SOAFAL Lectures

Starting in April 2024, the Academy Trust and Shiksha 'O' Anusandhan University, Bhubaneswar, with the participation of the Academy's Women in Science Panel, have been jointly conducting an online lecture series on "Lilavati's Daughters: Women Scientists of India." These are given by women scientists featured in the book "Lilavati's Daughters" published by the Academy, where they talk about their subjects and their journey, both personal and professional, through Academia and Research. The lectures are usually conducted on the second and fourth Saturday of each month between 4.30 to 5.30 PM, followed by a Q&A session. The audience is largely composed of UG science students and university faculty, apart from other invited guests. Over the months, the lectures have become very popular, with an average audience of 100 to 150-plus.

During the Academic Year April 2024 and March 2025, twenty-four lectures were delivered by the following women scientists:

20.04.2024	Shikha Varma	Excitements in Nanotechnology
11.05. 2024	Priyambada Mohanty Hejmadi	The Amazing World of Life Science
01.06. 2024	Pushpa Khare	Understanding the Universe
08.06. 2024	Prajval Shastri	Meandering into Astrophysics
06.07. 2024	Sujatha Ramdorai	The Art of Math
13.07. 2024	Tanusri Saha-Dasgupta	Women in Science: A Braided Trail
27.07.2024	Shobhana Narasimhan	My Journey as a "Materials Girl"
10.08. 2024	Bindu A Bambah	Factors Affecting Gender Equality in the Sciences
17.08.2024	Supurna Sinha	Down Memory Lane: A Scientific Journey.
14.09.2024	Vidita Vaidya	Life Experiences Shape the Brain and the Trajectory of a Lab
21.09.2024	Annapurni Subramaniam	Astronomy from Ground and Space: My Journey
28.09.2024	Qudsia Tahseen	Nematodes Unveiled: A Glimpse into their Microscopic World.
05.10.2024	Srubabati Goswami	The Quest for the Elusive Neutrino: The Nobel Journey
19.10.2024	Archana Bhattacharyya	Exploring the Links between Earth's Magnetic Field and Space Weather
02/11/2024	Usha Vijayaraghavan	Codes for the Making of a Rice Flowering Stem

16/11/2024	BK Thelma	Genome Treasure Hunt and Leads for Human Health and Disease
14.12.2024	Manju Bansal	From Stabilizing Collagen to Destabilizing DNA: an <i>in-silico</i> Perspective
21.12.2024	Mythily Ramaswamy	My Journey in the World of Differential Equations
28.12.2024	Chandrima Saha	The Joy of Being a Scientist
11.01.2025	Sumati Surya	Light, Order-Action! Reconstructing Spacetime from Causality
18.01.2025	Anuradha Lohia	From Entamoeba Histolytica to Homo Sapiens: My Evolutionary Journey
08.02.2025	Sushmita Mitra	Life is a Journey: Harnessing Artificial Intelligence for Healthcare
01.03.2025	Sulabha Pathak	Taking the long way home
08.03.2025	Saraswathi Vishveshwara	Study of Protein Structures from Atomic Level to Biological Network Level: A Multidisciplinary Approach
15.03.2015	Sulabha K Kulkarni	Materials Matter

The series also included a Memorial Lecture, "*Rohini Godbole: A Tireless Champion for Science, and Women in Science*" by Ram Ramaswamy on 30th November 2024, in honour of Rohini Godbole.

The collection of lectures were later published by SoA University in a book, SOAFAL Mala Vol IV, for distribution among libraries and the general public.

Public Outreach: Science Sanje

Between February 2024 and January 2025, the Academy Trust partnered with Kalasuruchi-Kutuhali of Mysuru to conduct a monthly program every second Saturday evening for the general public. The program featured scientific talks by scientists and science educators on topics as diverse as Entomology, Nanotechnology, Materials Science, Herpetology, AI and Big Data, and Human Health.

INDUSTRY INTERNSHIP PROGRAMME

TCS: Tata Consultancy Services: During 2024 no candidates were able to take up the internship for various reasons.

IISc-Axis Bank Centre for Mathematics & Computing: During 2024, twenty B.Tech candidates from different institutes across India were selected for this prestigious initiative and worked on various projects in different IISc labs. The list of students is given below.

Suryaraj B
IISER Thiruvananthapuram

Kavijeevan TT
Bharathiar University, Coimbatore

Naman Pankaj Kankariya
Indian Institute of Technology (BHU),
Varanasi

Sandhiya M
Madurai Kamaraj University

Harsh Anand
IIT Goa

Spandan Mitra
Indian Institute of Technology Kharagpur

Md Ashraf
IIT (ISM) Dhanbad

Sanchari Roy Chowdhury
Rajiv Gandhi Centre for Biotechnology
(RGCB) Thiruvananthapuram

Anirudh EV
NIT Trichy, Thiruchirapalli

Srijita Pal
Jadavpur University, Kolkata

Fathima Kamarudheen
Cochin Institute of Science & Technology

Suman Bhowmick
Ramakrishna Mission Vivekananda
Centenary College, Rahara, Kolkata

Guruprasad Sahu
NISER Bhubaneshwar

Krishnendu Chowdhury
IIT BHU Varanasi

Prachiti Sharma
IISER Berhampur

Nishant Mahamuni
National Institute of Technology
Karnataka

Aditya Garg
Indian Statistical Institute, Bangalore

Nishu Verma
Banasthali Vidyapith, Rajasthan

Soumitra Joshi
Rajiv Gandhi Centre for Biotechnology
(RGCB) Thiruvananthapuram

Sreeraj A
Swami Anandhatheertha Campus, Kannur
University, Payyanur
